

12_27 Danger Tree Area Easement Added to Workspace

Question:

Can Roadway incorporate "Danger Tree Area" Easement into the workspace?

Answer:

"Danger Tree Area" Easement has been incorporated into Roadwaysworkspace and can be added to plans via the RD_DraftTools Design Database (DDB).

Using Geopak D&C Manager, the line delineating the limits for Danger Tree Area Easements can be placed. Also the text label for Danger Tree Area can be placed all on the correct level (Place Influence Automatically Checked On).

Note the symbology for Danger Tree Area Easements will not be included in the Conventional Symbols Sheet (1-B). We are in the process of requesting modifications to the Right of Way Checker MDL Application as well as the Deed Draft Program.
